MARKDOWN LANGUAGE ASSIGNMENT-01

Create Your Own Personal Data Science Document

Topic: Markdown Language
Submission: Markdown file (.md) and exported PDF

Important Instructions

Individual Work

This is an **individual assignment**.

Every student's document must contain their own:

- Name , Academic information , Skills , Interests , Learning experience, Personal data, Examples , Project idea, Dataset, Reflection

No Copy-Paste

you must write your **own content**. Do not copy another student's: Paragraphs, Tables, Numbers , Project description, Dataset, Examples, Reflection

Important

The purpose of this assignment is not only to produce a document. You must demonstrate that **you understand and can use Markdown syntax**.

The Tas may ask you to modify your document during a short viva/demo.

PART A — MY PERSONAL PROFILE

Create a Markdown file named:

RollNo_markdown_assignment.md

Create the following section:

About Me

Write at least **100 words** about yourself.

Include:

- Your full name
- Your degree/program
- Your semester
- Your university
- Your hometown/city
- Your interests

- Why you are learning Data Science
- Your future career goal

Your paragraph must demonstrate:

Heading , Bold text , Italic text , Inline code

For example, you may mention technologies such as Python, Pandas, or NumPy.

Important: Write your own information.

PART B — MY TECHNOLOGY SKILLS

Create a section:

My Technology Skills

Create a Markdown table containing at least **8 technologies**.

Use the following structure:

Technology	**My Level**	**Experience**	**I Use It For**
Python			
Pandas			
NumPy			

Add at least four more technologies.

Possible technologies include:

Python , C++ , Java , SQL , HTML , CSS , JavaScript , Pandas , NumPy , Matplotlib etc.

Use your **actual current skill level**.

PART C — MY LEARNING JOURNEY

Create:

My Learning Journey

Create an ordered list containing at least **8 milestones** from your own learning journey.

For example:

1. Started learning programming
2. Learned Python
3. Created my first program
4. Learned NumPy

5. Learned Pandas

This is only an example. Write your **own learning journey**.

Nested List

Create a nested list showing your learning areas.

For example:

- Programming
    - Python
    - C++
- Data Science
    - NumPy
    - Pandas
    - Visualization
- Machine Learning
    - Regression
    - Classification

Use your own categories and technologies.

PART D — MY FAVORITE TECHNOLOGIES

Select **five technologies** that you personally like or find interesting.

For each technology, provide:

1. Technology name
2. Why you like it
3. Where you have used it
4. One useful online resource

For example:

Python

Write your own explanation about Python.

Add an appropriate hyperlink.

Example Markdown syntax:

[Python Official Website]

You must write your own explanation.

PART E — PROJECT CHECKLIST

Create a checklist showing the planned or completed activities of your project.

For example:

- Selected project topic
- Found dataset
- Downloaded dataset

Use:

- [x] Completed task

- [ ] Incomplete task

The checklist should represent your actual progress.

PART F — MATHEMATICAL EXPRESSIONS

Marks: 3

Include at least **two mathematical expressions**.

For example:

Mean

Mean = Σx / n

Accuracy

Accuracy = (TP + TN) / (TP + TN + FP + FN)

PART G — BLOCKQUOTE

Add at least **two quotations** related to:

Learning , Programming , Technology , Data Science , Artificial Intelligence

Use Markdown blockquote syntax:

> Your quotation goes here.

You may use quotations from public sources, but clearly identify the author/source where appropriate.

PART H — IMAGE

Add at least **one relevant image** to your document.

The image should be related to:

- Data Science

- Artificial Intelligence
- Programming
- Your project
- Your area of interest

Use Markdown image syntax:

![Image Description](image-url)

Add a meaningful alternative description.

PART I — CHECKLIST OF MARKDOWN FEATURES

Create a final section called:

Markdown Features I Practiced

Create a checklist containing at least **12 Markdown features**.

For example:

- Headings
- Bold
- Italic
- Strikethrough
- Ordered List
- Unordered List
- Nested List
- Links
- Images
- Tables
- Blockquotes
- Mathematical Expressions
- Horizontal Rule

You must mark the features that you actually used.
